Forensic Science International

Subject index

Volume 98 (1998)

Age; Radiology, Wrist joint and ankle joint **98**, 31

Age assessment; Rib phase analysis, Turks **98**, 47

Age estimation; Femur, Osteon, Histomorphometry, Compact bone **98**, 55

Age estimation; Forensic anthropology, Sex determination, Factors of individualization, Photograph comparison, Time since death estimation, 20th century **98**, 1

Artificial intelligence; Personal identification, Face photograph, Face recognition, Image processing, Superimposition, Symmetry group, Neural network, Fuzzy system **98**, 67

Ballistics; Black powder, Handguns, Gunshot wound **98**, 143

Basioccipital; Skeletal ageing, Basisphenoid, Sphenooccipital synchondrosis **98**, 41

Basisphenoid; Skeletal ageing, Basioccipital, Sphenooccipital synchondrosis **98**, 41

Black powder; Ballistics, Handguns, Gunshot wound **98**, 143

Bloodstain; Polymorphism, GPT, PCR–RFLP, Semen stain **98**, 185

Bone ageing; Bone elements, Bone minerals, Bone trace metals, Bone demineralization **98**, 109

Bone demineralization; Bone elements, Bone minerals, Bone trace metals, Bone ageing **98**, 109

Bone elements; Bone minerals, Bone trace metals, Bone demineralization, Bone ageing **98**, 109

Bone minerals; Bone elements, Bone trace metals, Bone demineralization, Bone ageing **98**, 109

Bone trace metals; Bone elements, Bone minerals, Bone demineralization, Bone ageing **98**, 109

20th century; Forensic anthropology, Age estimation, Sex determination, Factors of individualization, Photograph comparison, Time since death estimation **98**, 1

China, Japan, Thailand, Asia; Human identification, Humerus, Discriminant function analysis, Sex determination **98**, 17

Compact bone; Age estimation, Femur, Osteon, Histomorphometry **98**, 55

Control region; mtDNA, Hypervariable region I and II, Identity testing **98**, 169

Dating; Time of death, Skeletal remains, ^{210}Pb, ^{210}Po **98**, 119

Discriminant function; Forensic science, Human identification, Sex determination, Skull, Mandible, Osteometry, South Africa **98**, 9

Discriminant function analysis; Handedness estimation, Intertubercular sulcus **98**, 101

Discriminant function analysis; Human identification, Humerus, Sex determination, China, Japan, Thailand, Asia **98**, 17

Face photograph; Personal identification, Face recognition, Image processing, Superimposition, Symmetry group, Neural network, Fuzzy system, Artificial intelligence **98**, 67

PII: S0379-0738(98)00207-2

Face recognition; Personal identification, Face photograph, Image processing, Superimposition, Symmetry group, Neural network, Fuzzy system, Artificial intelligence **98**, 67

Factors of individualization; Forensic anthropology, Age estimation, Sex determination, Photograph comparison, Time since death estimation, 20th century **98**, 1

Femur; Age estimation, Osteon, Histomorphometry, Compact bone **98**, 55

Fluorescent; Spanish population, STR, PCR, Forensic genetics **98**, 179

Forensic anthropology; Age estimation, Sex determination, Factors of individualization, Photograph comparison, Time since death estimation, 20th century **98**, 1

Forensic entomology; Random amplified polymorphic DNA fingerprints, RAPD, Validation, Insects **98**, 157

Forensic genetics; Spanish population, STR, PCR, Fluorescent **98**, 179

Forensic science; Human identification, Discriminant function, Sex determination, Skull, Mandible, Osteometry, South Africa **98**, 9

Fuzzy system; Personal identification, Face photograph, Face recognition, Image processing, Superimposition, Symmetry group, Neural network, Artificial intelligence **98**, 67

GPT; Polymorphism, PCR–RFLP, Bloodstain, Semen stain **98**, 185

Gunshot wound; Ballistics, Black powder, Handguns **98**, 143

Handedness estimation; Intertubercular sulcus, Discriminant function analysis **98**, 101

Handguns; Ballistics, Black powder, Gunshot wound **98**, 143

Height; Individuality, Medial condyle of tibia, Medial malleolus, Percutaneous tibial length (PCTL), Regression equation formula **98**, 137

Histomorphometry; Age estimation, Femur, Osteon, Compact bone **98**, 55

Human identification; Forensic science, Discriminant function, Sex determination, Skull, Mandible, Osteometry, South Africa **98**, 9

Human identification; Humerus, Discriminant function analysis, Sex determination, China, Japan, Thailand, Asia **98**, 17

Humerus; Human identification, Discriminant function analysis, Sex determination, China, Japan, Thailand, Asia **98**, 17

Hypervariable region I and II; mtDNA, Control region, Identity testing **98**, 169

Identity testing; mtDNA, Hypervariable region I and II, Control region **98**, 169

Image processing; Personal identification, Face photograph, Face recognition, Superimposition, Symmetry group, Neural network, Fuzzy system, Artificial intelligence **98**, 67

Individuality; Medial condyle of tibia, Medial malleolus, Percutaneous tibial length (PCTL), Height, Regression equation formula **98**, 137

Insects; Random amplified polymorphic DNA fingerprints, RAPD, Validation, Forensic entomology **98**, 157

Intertubercular sulcus; Handedness estimation, Discriminant function analysis **98**, 101

Mandible; Forensic science, Human identification, Discriminant function, Sex determination, Skull, Osteometry, South Africa **98**, 9

Medial condyle of tibia; Individuality, Medial malleolus, Percutaneous tibial length (PCTL), Height, Regression equation formula **98**, 137

Medial malleolus; Individuality, Medial condyle of tibia, Percutaneous tibial length (PCTL), Height, Regression equation formula **98**, 137

mtDNA; Hypervariable region I and II, Control region, Identity testing **98**, 169

Musculoskeletal system; Physical anthropology, Positive identification, X-rays **98**, 91

Neural network; Personal identification, Face photograph, Face recognition, Image processing, Superimposition, Symmetry group, Fuzzy system, Artificial intelligence **98**, 67

Offender groups; Statistical analysis, significant difference **98**, 151

Osteometry; Forensic science, Human identification, Discriminant function, Sex determination, Skull, Mandible, South Africa **98**, 9

Osteon; Age estimation, Femur, Histomorphometry, Compact bone **98**, 55

^{210}Pb; Time of death, Skeletal remains, Dating **98**, 119

PCR; Spanish population, STR, Forensic genetics, Fluorescent **98**, 179

PCR–RFLP; Polymorphism, GPT, Bloodstain, Semen stain **98**, 185

Percutaneous tibial length (PCTL); Individuality, Medial condyle of tibia, Medial malleolus, Height, Regression equation formula **98**, 137

Personal identification; Face photograph, Face recognition, Image processing, Superimposition, Symmetry group, Neural network, Fuzzy system, Artificial intelligence **98**, 67

Photograph comparison; Forensic anthropology, Age estimation, Sex determination, Factors of individualization, Time since death estimation, 20th century **98**, 1

Physical anthropology; Positive identification, X-rays, Musculoskeletal system **98**, 91

^{210}Po; Time of death, Skeletal remains, Dating **98**, 119

Polymorphism; GPT, PCR–RFLP, Bloodstain, Semen stain **98**, 185

Positive identification; Physical anthropology, X-rays, Musculoskeletal system **98**, 91

Radiology; Age, Wrist joint and ankle joint **98**, 31

Random amplified polymorphic DNA fingerprints; RAPD, Validation, Insects, Forensic entomology **98**, 157

RAPD; Random amplified polymorphic DNA fingerprints, Validation, Insects, Forensic entomology **98**, 157

Regression equation formula; Individuality, Medial condyle of tibia, Medial malleolus, Percutaneous tibial length (PCTL), Height **98**, 137

Result reproducibility; Uniformity of DNA profiling results, STR loci **98**, 193

Rib phase analysis; Age assessment, Turks **98**, 47

Semen stain; Polymorphism, GPT, PCR–RFLP, Bloodstain **98**, 185

Sex determination; Forensic anthropology, Age estimation, Factors of individualization, Photograph comparison, Time since death estimation, 20th century **98**, 1

Sex determination; Forensic science, Human identification, Discriminant function, Skull, Mandible, Osteometry, South Africa **98**, 9

Sex determination; Human identification, Humerus, Discriminant function analysis, China, Japan, Thailand, Asia **98**, 17

Significant difference; Statistical analysis, Offender groups **98**, 151

Skeletal ageing; Basisphenoid, Basioccipital, Sphenooccipital synchondrosis **98**, 41

Skeletal remains; Time of death, Dating, ^{210}Pb, ^{210}Po **98**, 119

Skull; Forensic science, Human identification, Discriminant function, Sex determination, Mandible, Osteometry, South Africa **98**, 9

South Africa; Forensic science, Human identification, Discriminant function, Sex determination, Skull, Mandible, Osteometry **98**, 9

Spanish population; STR, PCR, Forensic genetics, Fluorescent **98**, 179

Sphenooccipital synchondrosis; Skeletal ageing, Basisphenoid, Basioccipital **98**, 41

Statistical analysis; significant difference, Offender groups **98**, 151

STR; Spanish population, PCR, Forensic genetics, Fluorescent **98**, 179

STR loci; Uniformity of DNA profiling results, Result reproducibility **98**, 193

Superimposition; Personal identification, Face photograph, Face recognition, Image processing, Symmetry group, Neural network, Fuzzy system, Artificial intelligence **98**, 67

Symmetry group; Personal identification, Face

photograph, Face recognition, Image processing, Superimposition, Neural network, Fuzzy system, Artificial intelligence **98**, 67

Time of death; Skeletal remains, Dating, ^{210}Pb, ^{210}Po **98**, 119

Time since death estimation; Forensic anthropology, Age estimation, Sex determination, Factors of individualization, Photograph comparison, 20th century **98**, 1

Turks; Rib phase analysis, Age assessment **98**, 47

Uniformity of DNA profiling results; STR loci, Result reproducibility **98**, 193

Validation; Random amplified polymorphic DNA fingerprints, RAPD, Insects, Forensic entomology **98**, 157

Wrist joint and ankle joint; Age, Radiology **98**, 31

X-rays; Physical anthropology, Positive identification, Musculoskeletal system **98**, 91
